

CRIMER

The online crime investigation and management system for assisting organizations like RAW, IB, ATU, Seals etc.

DESCRIPTION

- **PLATFORM for the user system** - Android (Java + XML)
- **PLATFORM for the database** – Buddy
- The current state of the understanding of this project statement demands us to have one separate app for an ADMIN, which has privileges as mentioned in the upcoming slides.
- Parallel to that, we also need to develop another app that can throw up functionalities for a PUBLIC USER as well as an EXECUTIVE PERSONNEL of the organization using our system, privileges from whom is also explained in the upcoming slides.
- We should have a database that should store the information required by the system, which we plan to create using the Buddy platform.

EXPECTED PRIVILEGES

ADMIN

1. Add, edit and delete **police departments**
2. Add, edit and delete **criminal records**
3. Add, edit and delete **suspected terrorists**
4. Send messages to users and executives
5. Add, edit and delete executives
6. Has a full control over users using the app.

USER

1. Can view the details of police departments i.e. Superintendent of Police, constables and its location.
2. Can view the details of criminal records
3. Report an instance of crime i.e. lost and found, unidentified or unattended objects, theft, murders, rapes etc.

EXECUTIVE

1. Can view the encrypted messages sent by the approver or helper
2. Can send messages to Superintendent of Police of different police departments
3. An executive can be defined as the Defense Minister of the Country or even the organization's agents like the chief, IT support head, field duty head, Superintendent of Police in different locations etc. However, the constables or other member of the department may still be included in the public user domain and not the executive domain.
